PROFESSIONAL EXPERIENCE

- Software Developer | iFlair Web Technologies Pvt. Ltd.** Jan 2024 – Present
 - Delivered end-to-end full-stack business modules, including frontend interfaces, backend APIs, authentication, databases, and deployment.
 - Improved application performance, reliability and security through debugging, optimization, Docker-based deployments, and secure authentication workflows.
 - Adopted AI-assisted engineering workflows using Cursor, OpenAI Codex, Claude Code and ChatGPT to accelerate feature development, debugging, refactoring, code reviews, and technical research while maintaining production-quality code.

PROJECTS

ArchForge AI – AI Backend Architecture Copilot

- Tech: Next.js, TypeScript, Shadcn/ui, React Flow, OpenAI API, Ollama**
- Built an AI-powered platform that transforms product ideas into production-ready backend architecture blueprints.
- Designed interactive system architecture diagrams, API contracts, database schemas, infrastructure plans, and development roadmaps using AI-generated mock workflows.
- Developed a polished MVP for the OpenAI × Outskill Hackathon, validating the architecture-first development experience with realistic mock data.

TMV - Supplier Portal

- Tech: Node JS, Express JS, JWT, Postman, MongoDB, Arcjet**
- Developed secure authentication with JWT, RBAC, email verification and password reset flows
- Integrated Arcjet for advanced API security: bot protection, abuse detection and intelligent rate limiting
- Implemented additional hardening: input validation, sanitized payloads, security headers and token blacklisting

LeetLab – Coding Practice Platform

Tech: React.js, Zustand, NeonDB, Prisma, Node.js, Judge0, Docker

- Built a full-stack coding practice platform with problem lists, submissions, and code-editor UI.
- Integrated a open source Judge0 code execution engine using Docker, enabling safe, isolated code execution for multiple languages.
- Designed scalable backend logic using Prisma ORM and PostgreSQL with optimized schemas.
- Demonstrates end-to-end full-stack capability and real-world system design.

TECHNICAL SKILLS

Languages: Typescript, JavaScript, SQL, PHP

Technologies: React.js, Next.js, Zustand, Tailwind CSS, Shadcn, Node.js, Express.js, Prisma, Laravel

Database: PostgreSQL, MongoDB, MySQL

Tools: Docker, GitHub, GitLab, Postman, Sentry.io, Vercel, Render, Cursor AI, OpenAI Codex

EDUCATION

B.E. Computer Engineering **CGPA-7.79**

Darshan Institute of engineering & technology

2020 – 2024 | Rajkot, India

Higher Secondary in Science

Dhaval International school

2019 – 2020 | Jetpur, India

ACHIEVEMENTS

OpenAI × Outskill Hackathon (2026):

Selected among the **Top 1,000** out of **10,000+ registrations**, achieving a **71/100 evaluation score** for **ArchForge AI**, an AI-powered backend architecture copilot.
